題號	答案	題 目	分類 編號
234	3	Which of the following is the maximum speed limit for either freeway or fast roads under normal weather conditions? (1) 120km per hour, (2) 110km per hour, (3) drivers are required to comply with the instructions shown on the speed limit sign.	04
235	2	If visibility drops to an extremely level in the freeway due to heavy fog, heavy smoke, heavy rain, and gusty winds, vehicles are required to: (1) keep their speeds 60km per hour or faster, (2) either reduce speed to less than 40km per hour or pull to the road shoulder and stop temporarily and, at the same time, turn on the warning lights, (3) continue to move at normal speeds.	04
236	2	Drivers: (1) may overtake other vehicles, (2) may not overtake other vehicles, (3) may stop their vehicles temporarily when they are driving on the ramp of a one-way lane or on an acceleration/deceleration lane.	04
237	1	Drivers are required to: (1) pull their vehicles out of the lane and stop on the road shoulder and wait for rescue, (2) stop immediately and ask passengers to get off the vehicles to seek rescue, (3) call their friends to tow the vehicles, if their vehicles break down on freeway.	04
238	1	Drivers: (1) may not accelerate speeds beyond the speed limit and may not reduce speed below the speed limit, (2) may accelerate speeds beyond the speed limit but may not reduce speed below the speed limit, (3) may not accelerate beyond the speed limit but may reduce speed below speed limit when they are driving on freeway.	04
239	2	Freeway's lanes are: (1) divided by roads, (2) one-way lanes divided by barriers, (3) lanes divided by light signals.	04
240	2	If drivers find the vehicle on the next lane intends to change lane and has turned on direction light, drivers are required to: (1) speed up to block the overtaking, (2) reduce speed moderately and yield, (3) drive with that vehicle side by side and compete against each other.	04
241	2	When vehicles are moving at high speed, which of the following is true about driver's visions: (1) cannot adapt to the situation definitely, (2) decrease due to the high speed, (3) increase.	04
242	2	Drivers are required to reduce speed and: (1) shorten the distance to the front vehicle, (2) increase the distance to the front vehicle, (3) there is no any other requirement for the driver, if they drive in heavy fog, heavy smoke, heavy rain, and gusty winds.	04
243	2	Drivers: (1) may not overtake other vehicles under any circumstances, (2) may change to a safe lane and overtake other vehicles at the speed permitted by law, (3) may overtake other vehicles in certain areas when they are driving on freeway.	04

題號	答案	題 目	分類 編號
244	2	If drivers miss the off-ramp on the freeway, they: (1) may make U-turn to the ramp, (2) keep going until they reach the next ramp, (3) may reverse their vehicles to the ramp.	04
245	3	The plum-blossom sign is: (1) a decoration provided on the roadside, (2) the sign of important highway, (3) the sign of national freeway.	02
246	3	Freeway's inside lane is provided for overtaking. Nevertheless, small vehicles: (1) may, (2) may not, (3) may change to the inside lane and move at the maximum speed allowed by that route.	04
247	1	Large vehicles are required to use: (1) outside lane, (2) inside lane, (3) there is no any requirement for the driver when they are moving on freeway, except for overtaking.	04
248	3	In addition to turning on direction light, which of the following is the most important for drivers if they intend to change lanes? (1) just cut into lanes whenever they have a chance, (2) just watch for the safety distance to the front vehicle, (3) watch for the safety distance to the front vehicle as well as the safety distance to the rear vehicle.	04
249	3	Drivers: (1) may speed up beyond speed limit, (2) may overlook traffic rules, (3) are required to abide by traffic rules even if they are in a hurry.	01
250	1	What is defense driving? (1) to take cautious actions to prevent accidents from happening, (2) outstanding driving skills, (3) good habits for daily life.	01
251	3	Prior to entering into main line of freeway, drivers: (1) are required to decelerate speed on the acceleration lane and verify safety before they move into the main line, (2) turn on the left direction light and go ahead to enter into the main line, (3) are required to accelerate speed on the acceleration lane and verify safety before they move into the main line.	01
252	2	To get off the main line, drivers: (1) may do it at their discretions, (2) stay on the right lane and decelerate their speeds to get off the main line, (3) turn on the right direction light and go ahead to get off the main line.	01
253	3	Driving at night passing through urban areas, meeting other vehicles at the merge-point or within 100 meters to the front vehicle, drivers are required to: (1) wear colored glasses, (2) use distance lights, (3) use near lights for safety.	01
254	1	Driving on a flooded area, drivers are required to: (1) reduce speed and continue to proceed, (2) pass through quickly, (3) use brakes as much as possible.	01

255	3	If your vehicle is skidding, you are required to: (1) turn your steering wheel to the skidding direction, (2) brake your vehicle immediately, (3) turn your steering wheel to the skidding direction, but do not turn abruptly.	01
256	1	If vehicles causes accident, drivers are required to: (1) not to change the accident site and call the police immediately, (2) get away from the accident site. It's not my business at all. (3) argue with people there to shift my responsibility.	01
257	2	Those drivers who disagree to the opinions released by the regional assessment committee regarding accident liability: (1) have to obey to the opinions without any objection whatsoever (2) may request the review authority for a review (3) may file a complaint to the judicial authority.	01
258	2	The faster the speed, the: (1) unchanged, (2) narrower, (3) wider the driver's visions.	01
259	1	Speeding is the dominant reason for accidents. How to prevent accidents from happening? (1) organize your daily life so as not to speed up in a rush, (2) decrease the engine throttle's fuel flowing speed, (3) use a bigger brake.	01
260	3	Which of the following is incorrect for vehicles turning left at intersection? (1) drivers may turn left as soon as the left light is on, (2) drivers may turn left after all vehicles moving straightforward have passed through the intersection, (3) drivers may turn left as soon as green light is on.	01
261	1	Which of the following is the dominant reason for the chaotic traffic, traffic congestion, even accidents? (1) either drivers or road users do not abide by traffic rules, (2) there are too many vehicles, (3) the roads are not wide enough.	01
262	1	Accidents happen when people either disobey or overlook traffic rules. Which of the following is the most important task in connection with upgrading traffic safety? (1) drivers develop their morals by attending traffic rule training programs, (2) drivers upgrade their driving skills, (3) drivers learn how to maintain their vehicles.	01
263	1	At the intersection of multiple lanes, drivers: (1) may not change lane in the double-white solid-line areas, (2) drivers may change lane in the double-white solid-line areas in order to turn right or turn left easily, (3) may either pick up or drop passengers in the double-white solid-line areas.	01

題號	答案	題 目	分類 編號
264	1	If the light's radiation distance suddenly grows longer, probably because the vehicles are moving downhill. Therefore, drivers are required to: (1) slow down, (2) speed up, (3) turn off headlights for safety.	01
265	1	If drivers find their headlights disappear at night, probably because the roads are broken, bridges are broken or road surface collapses. Therefore, they are required to: (1) leave the vehicles and check it out before they continue to drive, (2) disregard it and continue to drive, (3) turn off headlights in order to avoid reflection so they can watch the surrounding objects clearly.	01
266	1	When vehicles are moving under gusty winds and drivers are feeling their vehicles vibrating, they are required to: (1) hand on to the steering wheels and slow down, increase the distance to the front vehicle, and do not change lanes, (2) speed up to pass through the windy area, (3) disregard it, because it doesn't affect safety at all.	01
267	3	Accidents happen at the turn, because drivers: (1) ignore the blind spots only, (2) ignore the inner wheel difference only, (3) ignore both the blind spots and the inner wheel difference.	01
268	3	Pre-driving maintenance and checkup are particularly important for vehicles moving on freeway. Therefore, (1) just checking fuel is sufficient, (2) just checking fuel and power is sufficient, (3) fuel, water, and power have to be checked.	01
269	3	Drunk-driving produces visual's tunnel effect for drivers. The drunk-drivers are feeling as if they are driving in the tunnel in which the front area is bright but the surrounding areas are dark. Therefore, drunk-drivers' visions: (1) do not change at all, (2) become wider, (3) become narrower.	01
270	1	Large vehicle's passage produces a powerful sucking in the same way as a pump sucks air. Therefore, drivers are required to: (1) hand on to their steering wheel, (2) release their steering wheel, (3) do not worry about if their vehicles are moving side by side with a large vehicle.	01
271	3	Prior to driving on the freeway, drivers are required to listen to the radios and use the traffic information provided by: (1) phone No. 104, (2) phone No. 117, (3) phone No. 1968 so as to keep up with the traffic conditions thereby adjust their routes flexibly.	01
272	3	When riding on an expressway or freeway (1) Large vehicles only, (2) Slow vehicles only, (3) Large vehicles and slow vehicles may not use the inner lane of freeway so as to avoid other vehicles from changing lanes for overtaking.	01

題號	答案	題 目	分類 編號
294	2	Why is the adequate distance needed for accident prevention? (1) because of friction, (2) because of sufficient reaction time and space, (3) because of traction.	01
295	1	The minimum safety distance has to be: (1) larger than, (2) smaller than, (3) equal to the parking distance.	01
296	1	The faster the speed, the lower the gravity and the: (1) better, (2) worse, (3) unchanged the stability.	01
297	2	When vehicles are turning, the longer the wheelbase, the larger the difference between inside wheel and outside wheel, which means the road has to be: (1) narrower, (2) wider, (3) unchanged.	01
298	3	When vehicles are moving on a flooded road, drivers had better: (1) turn on lights, (2) step on clutches, (3) keep their feet on the brakes.	01
299	3	Which of the following is correct? (1) if warning light appears in the dashboard when vehicles are moving, drivers are required to disregard it, (2) if drivers see smoke coming out of engine, drivers are required to continue to drive the vehicles, (3) if brake is not working, drivers are required to calm down and pull vehicles to the empty area.	01
300	2	If drivers cause accident without any injury nor death and vehicles are still in working conditions, which of the following are required to be done immediately? (1) wait for the police officers, (2) mark the vehicle's position and pull it to the roadside, (3) notify the insurance company.	01
301	1	After marking the positions of relevant evidence on the ground, the vehicles are required to be pulled to the roadside immediately if: (1) it is a minor accident without any injury nor death, (2) someone is injured severely, (3) someone is killed.	01
302	2	If an accident takes place on a road wherein the speed limit exceeds 50~60km per hour, how many meters behind the vehicle are required to driver place a vehicle breakdown sign? (1) 50~100 meters, (2) 30~100 meters, (3) 5~30 meters.	01
303	3	If the responsibility of accident is to be decided in accordance with the right of road, which of the following is correct? (1) vehicles moving straightforward are required to yield to the vehicles making turns, (2) whichever vehicle reaches the intersection has the precedence, (3) vehicles making turns are required to yield to the vehicles moving straightforward.	01

題號	答案	題 目	分類 編號
349	3	Which of the following is the most important advantage of the power steering wheel? (1) the power steering wheel allows drivers to change the speed reduction ratio, (2) the power steering wheel allows drivers to turn the vehicles at a wider angle, (3) power steering wheel helps drivers turn the vehicles easily.	05
350	1	Drivers can press the cigarette lighter into position. The lighter springs back when it is heated. Drivers: (1) are required to concentrate on driving and may not use the cigarette lighters when they are driving, (2) may use cigarette lighters if they feel safe, (3) have to use cigarette lighter to keep them awake.	05
351	1	Which of the following is the most appropriate timing for adjusting seats? (1) before driving, (2) during driving, (3) after driving.	05
352	3	Which of the following is the most ideal height of driver's seat headrest? (1) above the driver's head, (2) below the driver's shoulders (3) same height as driver's ears.	05
353	2	A safety lock is provided in the back door to protect children from the injuries caused by opening the door carelessly. Therefore, (1) the back door can be opened only from inside the vehicle, (2) the back door can be opened only from outside the vehicle, (3) the back door cannot be opened from either inside the vehicle or outside the vehicle, if the safety lock is locked.	05
354	3	Usually, people press the trunk release button provided in the vehicle to open the trunk. Which of the following is the best timing to open the trunk? (1) after the vehicle is parked, (2) after the vehicle is parked and the shift stick is pressed to P, (3) after the vehicle is parked, shift stick is pressed to P, and manual brake is pulled up.	05
355	1	Vehicles are provided with rear mirror and interior mirror: (1) to help drivers expand their visions and keep up with the road situation behind their vehicles, (2) to facilitate drivers using cosmetics, (3) as decorations.	05
356	3	Which of the following is the normal color of the exhaust discharged by petrol engines? (1) black, (2) blue and white, (3) colorless.	05
357	2	If a petrol engine discharges black exhaust, that means: (1) petrol is combusted completely, (2) petrol is not combusted completely, (3) oil is combusted.	05
358	3	To start an automatic vehicle, drivers are required to press the shift stick to: (1) D, (2) R, (3) P.	05

題號	答案	題 目	分類 編號
359	2	Prior to pressing the shift stick from P to R or D, drivers are required to: (1) step on accelerator, (2) step on brake, (3) just go ahead and press.	05
360	3	To park an automatic vehicle, drivers are required to pull the manual brake and press the shift stick to (1) D, (2) R, (3) P thereby prevent the vehicle from sliding.	05
361	1	Most of automatic vehicles are designed as front-wheel-drive vehicles. Which of the following is the correct way to tow the vehicles in order not to damage the transmission mechanism? (1) lift the front wheels with the rear wheels on the ground, and tow the vehicles to the front, (2) lift the rear wheels with the front wheels on the ground, and tow the vehicles to the rear, (3) 4 wheels on the ground, and tow the vehicles to the rear.	05
362	2	To switch from D to R or from R to D: (1) drivers do not have to wait until the vehicles stop completely, (2) drivers have to wait until the vehicles stop completely, (3) it doesn't matter whether to stop or not.	05
363	3	When can drivers check the tire pressure? (1) anytime, (2) when tires are in normal temperature after driving, (3) when tires are in normal temperature before driving.	05
364	1	Insufficient tire pressure is likely to cause: (1) tire's both sides to wear out, (2) tire's middle area to wear out, (3) steering becomes easier.	05
365	3	Insufficient tire pressure is likely to cause: (1) fuel conservation, (2) steering wheel becomes lighter, (3) steering wheel becomes heavier and waste fuel,	05
366	2	If all tires' pressures are uneven, that is likely to cause: (1) engine knocking, (2) biased driving, (3) nothing.	05
367	2	Which of the following is the most vulnerable part of the tire? (1) tread, (2) fetal side (side), (3) fetal lip.	05
368	1	Tire's central treads are worn out excessively, because: (1) tire pressure is too high, (2) tire pressure is too low, (3) the load was too heavy.	05
369	2	If tires are worn out excessively: (1) there is no danger at all, (2) it is likely to affect the vehicles' steering and braking distance, (3) passengers feel more comfortable when they are in the vehicles.	05
370	2	If brake is used repeatedly, the brake drum temperature rises and the braking performance: (1) turns better, (2) turns worse, (3) remains unchanged.	05
371	1	If vehicles move downhill repeatedly and use the brake for a long time, the brake oil temperature is likely to: (1) rise, (2) remain unchanged, (3) drop and thus affect safety.	05

題號	答案	題 目	分類 編號
372	3	It drivers smell burning odor when vehicles move down a long slope, it's probably because: (1) the exhaust is overheated, (2) the clutch is skidding, (3) the brake was used excessively.	05
373	2	If vehicle head turns either right or left when you use the brake, it's because: (1) there is too much brake oil, (2) one of the two front wheels is probably not working normally, (3) there is air in the brake pipe.	05
374	3	If you feel the brake pedal soft when you step on it, it's because: (1) the oil pipe is blocked, (2) oil flew to the brake pad, (3) there is air in the brake oil pipe.	05
375	1	When you step on the brake pedal without releasing it and start engine again, if you find the brake pedal is lower than its usual position by 1 inch, that means: (1) the brake is in normal condition, (2) the brake oil is leaking, (3) the vacuum brake auxiliary device broke down.	05
376	2	Student drivers' driving route is approved by: (1) the motor vehicle registration department, (2) local police authority, (3) the Ministry of Education.	05
377	1	Which of the following is the most appropriate driving route for student drivers? (1) the roads approved by police authority, (2) whatever road with flat surface, (3) either fast road or freeway.	02
378	1	(1) Student drivers will be fined, (2) Vehicles will be detained, (3) Student driver's license will be cancelled, if student drives are not accompanied by a person with driver's license when they are learning road-driving.	02
379	2	Student drivers are required to have vehicle licenses with them together with: (1) student ID, (2) student driver's license, (3) ID card.	02
380	1	What happens if student drivers practice road-driving on an unapproved road or beyond the permitted hours although they have their student driver's licenses with them? (1) It's a violation and the student drivers will be fined, (2) It's all right as long as the student drivers are accompanied by their instructors, (3) there is no applicable rule at all.	02
381	1	If parking is prohibited on a road, what hours are vehicles prohibited from parking? (1) from 7 AM until 8 PM, (2) from 7 PM until 8 AM of the following day, (3) 24 hours a day.	02
382	3	If temporary parking is prohibited on a road, what hours are vehicles prohibited from temporary parking? (1) from 7 AM until 8 PM, (2) from 7 PM until 8 AM of the following day, (3) 24 hours a day. If the prohibition hours are to be reduced, a sign shall be erected to notify the general public.	02

題號	答案	題 目	分類 編號
393	3	When vehicles are on the roads provided with curves, steep slope, narrow bridge, and railroad crossing signs: (1) they may reverse vehicles for their convenience, (2) they may overtake other vehicles, (3) they may not overtake other vehicles.	02
394	1	The children 1~4 years old with weight 10~18kg: (1) are required to be seated on the back seat with seat belts fastened, (2) are required to be accompanied by adults on the front seat with safety belts fastened, (3) both statements are true.	02
395	3	With duties completed, the fire engines, ambulances, and security vehicles' speeds: (1) are not restricted, (2) shall be 50km per hour, (3) shall be determined in accordance with the requirements for the roads.	02
396	3	If drivers are on a rural road without any speed limit sign: (1) they don't have to worry about the speed limit at all, (2) they can speed up, (3) they may not exceed 50km per hour.	02
397	3	Vehicles shall be loaded in accordance with the rules. Which of the following is correct? (1) passengers may be seated outside the vehicle, (2) the trailer attached to a small vehicle may be loaded with whatever goods, (3) truck's cab and passenger sedan's front seat may not be seated with more people than the maximum number of people permitted by law.	02
398	1	Those passenger sedans more than 10 years old are required to be inspected at least: (1) twice, (2) 3 times, (3) 4 times a year.	02
399	2	A small vehicle's height may not exceed 1.5 times of its width. The maximum height may not exceed: (1) 2.75 meters, (2) 2.85 meters, (3) 2.5 meters.	02
400	1	When small vehicles are running on freeway, the safety distance between the front and rear vehicles, under the normal weather conditions, equals the vehicle's hourly speed: (1) divided by 2, (2) divided by 3, (3) divided by 4.	04
401	3	Those who drive their vehicles on the road shoulder of freeway unlawfully are subject to: (1) fines (2) recordation for violations without penalty (3) fines and recordation for violations.	04
402	1	To be eligible for moving on freeway, the tire's tread depth may not be less than: (1) 1.6mm, (2) 1.5mm, (3) 1.7mm.	04
403	2	Those drivers who fail to maintain safety distance on the freeway and thus cause accidents and death are subject to: (1) suspension of drivers' licenses (2) cancellation of drivers' licenses (3) cancellation of license plates.	04
